PROFESSIONAL EXPERIENCE

Software Developer   August 2015 – Present
TaxSlayer, LLC   Augusta, Georgia

Implemented new features requested by product stakeholders while maintaining and enhancing legacy projects

- Increased customer acquisition by converting our internal tax return conversion application to a customer facing application - C#, WPF
- Improved customer employee KPI tracking by developing a goals feature for our Taxslayer Pro web application - ASP.NET MVC, C#, VB, SQL, HTML5, CSS, jQuery, JavaScript
- Nominated for Outstanding Contributor Award

PROJECTS

Farm To Table
Live Site: https://glacial-falls-13622.herokuapp.com
Github Repo: https://github.com/raiford2530/farm_to_table
MERN fullstack application developed for local farmers to sell customized packages of produce online.

Core responsibilities included creating express API routes to query the MongoDB database on the backend, creating the shopping cart component and the functionality to add products to the shopping cart from the products page, and adding a feature to send a confirmation email after a customer places an order.

- **Technologies**: Javascript, Node.js, React.js, React-Router-Dom, Express, Bcrypt, JWT, Nodemailer, React-Toastify, MongoDB, Mongoose, Bulma, CSS3, Github, Heroku

BarkMatch
Live Site: https://vast-river-69240.herokuapp.com
Github Repo: https://github.com/raiford2530/BarkMatch-project2
A single page application developed for animal shelters to offer a way for people to sign up to spend time with dogs held at the shelter

Core responsibilities included creating express routes, creating express handlebar views, adding a filter feature, adding a feature to send confirmation emails, and implementing authentication

- **Technologies**: Express, Express Handlebars, Express-FileUpload, CSS3, HTML5, jQuery, Bulma, Javascript, Github, Heroku, Nodemailer, Node.js, MySql, Sequelize, Passport

ComicBook Finder
Live Site**:** https://shelb-doc.github.io/ComicBook-Finder/
Github Repo: https://github.com/raiford2530/ComicBook-Finder
A single page website with the purpose of helping comic book fans find characters and comics that the character had appearances in.

Responsibilities included creating API calls and dynamically populating elements with returned data.
- **Technologies**: HTML 5, CSS, jQuery, Bootstrap, Javascript, Github
